

SECOND ANNOUNCEMENT

Dear Colleagues,

We are pleased to announce that the International Beacon Satellite Symposium will be held at Boston College on 15 August 2022.

The Beacon Satellite Symposium is a triennial event organized by the Beacon Satellite Studies Group of URSI Commission C, an interdisciplinary group, servicing science, research applications and engineering aspects of satellite signals observed from the ground and in space.

The Beacon Symposia provided distinctive opportunities for ionospheric scientists from all over the world to meet and collaborate on topics relevant to ionospheric effects on radio propagation.

Recent meetings of the Beacon Symposia have hosted between 125 and 200 people from over 40 countries. In our most recent meetings, we have seen a marked increase in registration, leading to a reduction in the number of people attending the scientific sessions. Please also submit your abstracts to the registration committee by the deadline of 15 July 2022.
